Plover Nests

Total of 64
plover nests
as of July 11

Camera Monitoring

- EBQ #8 – How much of an effect does predation have on PP productivity (fledgling)?
- EBQ #9 – How effective is Program management at mitigating losses of PP productivity due to predation?

Predation Events

- Striped skunk on Kearney
Broadfoot South and Newark West

- Great horned owl on Dyer and
Newark East

Successful Nests

Total of 23 plover nests have successfully hatched as of July 11 and 15 fledglings produced
